
a
Energy E/t
Flux $\alpha = \Phi_p/(2\pi)$
b
Ribbon energy E/t
k_x
c
$|u_y(k_x)|^2$
Transverse site y
d
Transverse site y
Longitudinal site x
e
Transverse site y
Longitudinal site x
f
Probability in bottom three rows
Dimensionless time $t\,t_x$
flux $\alpha = 1/4$
zero-flux control
